Contents

1 Installation

Installation is done using the following steps for RPM based system. For APT based systems, replace `dnf` with `apt`.

```
1    sudo dnf install python3 python3-pip python3-virtualenv
2    python3 -m venv .venv
3    source .venv/bin/activate
4    python3 -m pip install pdm
5    pdm install
```

For running the application you can use the following command:

```
1    python3 main.py
```
